### Application:

The Barix intercom demo kit permits a quick and easy setup for the demonstration of intercom functionality and audio quality using MP3, G.711 and PCM encoding of the Barix Annunicom IC.

### Features:

- outdoor station with bell button and LED light for door strike status display
- indoor station with telephone handset and buttons for talk and door strike activation

### Additional requirements: (not included)

- 2 Barix Annunicom IC devices with power supplies and network cables
- network infrastructure (switch or hub)
- PC with standard web browser
