

- ⊕ To reach staff wherever they are in the building: doctors, teachers, employees
- ⊕ To reach people from wherever you are on campus in response to live events: principals, security guards, janitors, or other personnel
- ⊕ To selectively announce information to specific zones

Simple Paging Solution

Simple Paging is a powerful Barix solution to implement a complete paging system into your enterprise. The Simple Paging Solution supports a master-slave model with a powerful interface to show and manage all connected devices, groups and zones. The installation can easily be done on the existing network and does not need a server. Barix offers its Annunicom PS1 and PS16 as ideal master stations for Simple Paging.

A key-feature of the Barix Simple Paging Solution is the Simple Paging App to make public announcements from smartphones. The app is available for free from Apple App Store or Google Play. Access from mobile phone is protected through an optional password. Barix Simple Paging supports two announcement levels (normal paging and emergency notification) plus background music. To indicate voice announcements, an optional ,pre-gong' chime is available.

FEATURES:

- + Make announcements from paging stations or smartphones!
- + Superior audio quality
- + Multi-zone system with busy/offline indication per zone
- + Make announcements selectively into one, some or all zones
- + Low power and no maintenance cost, no PC or server needed
- + Easily add zones and paging stations as you expand the system through a simple web UI
- + Mobile paging restricted to authorized users
- + Multiple Paging Stations
- + Paging Station indicate when Zones are busy
- + Supports simultaneous paging to independent targets
- + Dynamic status indication to make maintenance easy
- + Modular and easily expandable
- + Supports zoned Background Music playback via multicast for low network traffic
