Firmware Name	Store&Play application v1.54		
Release Date	26 th November 2014		
Package Name	system_update-v1.54.pkg		
Version Overview	Component	Description	Version Date
	Utility	Proprietary Library	vb0.77_20141125
	Player	Proprietary Library	vb2.03_20141121
	S&P Application	Main application	v1.54_20141125

1. Hardware Compatibility

This firmware is intended to run on the following BARIX hardware:

- “Exstreamer Store&Play” IPAM 390 based Exstreamer 100L

2. New Features and Improvements

Compared to the previous version of Store&Play (v1.40):

- #761 Added Bootloader version info in STATUS tab of the web UI
- #773 Added 4 new fields in BariMon messages: IP address, FW version, Event timestamp and Last Update timestamp
- #788 Added <MAC> placeholder option in HTTP request for player.cfg
- Created “S” version

3. Bugs fixed in this version

Compared to the previous version of Store&Play (vb1.40):

- #778 Removed default MUSIC_SERVER from SYSLOG
- #785 Resolved “Copy to mSD” issues stopping the application
- #789 Fallback config server settings not applied in some cases
- #796 PLAYLIST tab shows last used Playlist as “active” when there’s no valid Playlist for playback
- #834 BariMon field values matching device’s web UI

4. Other remarks and known issues

These known issues will be resolved in future versions:

- #576 Web server UI activity can affect audio playback
- #694 Using “=” in a password can break password parsing
- #783 USB usage info is different depending on FS used (FAT or EXT4)
