

## Release Notes

### SoundScape application v1.11

<b>Firmware Name</b>	SoundScape application v1.11
<b>Release Date</b>	28 <sup>th</sup> February 2017
<b>Package Name</b>	soundscape_v111_20170228.pkg

# 1. Hardware Compatibility

This firmware is intended to run on the following BARIX hardware devices:

- “*Exstreamer Store&Play*” IPAM 390 based Exstreamer 100L
- “*Exstreamer SoundScape*” IPAM 390 based Exstreamer 100M-D and Exstreamer 100M-DP

# 2. New Features and Improvements

Compared to the previous version of SoundScape (v1.10):

- SS-1083: New re-buffering mechanism in low-buffer situations that prevents broken Stream playback and improves switching transitions from Failover Playlist to Stream.
- SS-1116: Changed the behaviour of Failover Playlist activation. Whenever the device needs to play the Failover Playlist it will resume the playback of the last Failover Playlist Track that had played at the point it stopped playing instead of starting the same Track from the beginning.

### 3. Bugs fixed in this version

Compared to the previous version of SoundScape (v1.10):

- SS-156 Fixed Buffer Size device configuration settings applied when decoding an HTTP stream (“Small” 10sec, “Medium” 30sec and “Large” 60sec).

## 4. Other remarks and known issues

These known issues will be resolved in future versions:

- #2048 Player device won't be able to play Tracks with associated metadata artwork that is bigger than 256kB
