

Release Notes

SoundScape application v1.12

Firmware Name	SoundScape application v1.12
Release Date	5 th September 2017
Package Name	soundscape_v112_20170905.pkg

1. Hardware Compatibility

This firmware is intended to run on the following BARIX hardware devices:

- “*Exstreamer Store&Play*” IPAM 390 based Exstreamer 100L
- “*Exstreamer SoundScape*” IPAM 390 based Exstreamer 100M-D and Exstreamer 100M-DP

2. Bugs fixed in this version

Compared to the previous version of SoundScape (v1.11):

- SS-1096, SS-1102 and SS-1164: Fixed some issues that prevented the application to recover the Stream playback getting stuck in a Failover state in low-buffer situations
- SS-1167: Fixed a bug that caused the error "Playback Issue: Couldn't play any Track in Playlist"

3. Other remarks and known issues

These known issues will be resolved in future versions:

- #2048 Player device won't be able to play Tracks with associated metadata artwork that is bigger than 256kB
