

RetailPlayer M400

IP Audio Decoder for Background Music Applications.

RetailPlayer M400 - the perfect solution for Background Music playback in professional environments. With its easy installation and powerful cloud management portal, you can monitor and control multiple devices worldwide for different brands. With 3 failover playback layers, increased buffer capability, and a Store & Play feature, you can ensure uninterrupted services. The device also offers remote firmware management, crossfading, and multiple scheduling features. Plus, with the RetailHero plan, you can extend scheduling possibilities to assets and play audio cues on demand. The M400's solid metal build delivers high-quality audio over a stereo output on cinch connectors providing the perfect connection to your amplification system. Where network cables can't be pulled, RetailPlayer M400 supports wi-fi connectivity through Wi-Fi dongles.
