

BARIX

Exstreamer Store&Play: FW update via web UI

1. **Download** and unzip **PKG** update file from www.barix.com/downloads

Note: Registered login credentials are required for downloading

2. Go to the **UPDATE** tab in the device's web User Interface:

3. Press “Please click here to start the update” button

Update

4. Press “**Choose file**” and select downloaded **PKG** update file
5. Press “**Upload**”
6. Wait until the device reboots itself (takes 5min).

DO NOT NAVIGATE AWAY OR REBOOT THE DEVICE WHILE UPDATING

IMPORTANT NOTE: Updating a Store&Play device to the newest version with streaming (v1.6x) from a previous version (v1.5x or older) requires to perform the web UI update twice and an additional extra step to “Reset Factory Defaults” from the DEFAULTS tab and then manually “Reboot” the device.

- ➔ If the 2nd web UI update is not done the update to v1.6x will not be completed
- ➔ If the “Reset Factory Defaults” is not done after the 2 updates, some features will not work
