

Barionet Overview

Universal, programmable I/O Device and IoT Sensor Servers.

BARIONET 1000

BARIONET 200

BARIONET 400

BARIONET 1100

The Barionet Products are fully programmable I/O device and IoT sensor server of Barix, based on Linux/Lede/OpenWRT. The devices feature a wide range of interfaces such as USB, WiFi, serial ports, analog and digital I/Os, Relays, Dallas 1-wire support and optional CAN Interface. They are IPv4 or IPv6 capable. Supporting SNMP, Modbus and universal ASCII protocols, the Barionet devices can be easily integrated into 3rd party management systems. Barix Products are developed in Switzerland and manufactured in the EU.

Applications

- Automation engineering in buildings, public transport and network infra-structures
- Machine control
- Access control and security systems driving horns or lights
- Environmental monitoring at power stations, sluices, or in agriculture
- Contact closure monitoring
- Logging of temperature and humidity
- HVAC steering
- PV power management

Features

- Embedded Linux / Lede / OpenWRT
- Programmable in C++, Lua or Python
- IPv4 / IPv6 stack
- 10/100 Ethernet ports
- Wi-Fi 802.11 b/g/n, 2.4Ghz
- Relay outputs
- Digital Outputs
- Digital Inputs
- Universal Inputs (analog or digital)
- RS232 Interfaces
- RS485 Interfaces
- USB Interfaces
- Interfaces for temperature sensor – Dallas
- 1-wire® 18DS20
- Real Time Clock
