RetailPlayer SP400

Sophisticated background music player for retail applications.

The RetailPlayer SP400 is PoE powered streaming player for multi-channel streaming of background music. It is a rock-solid metal device that needs little maintenance and can be installed almost everywhere by anyone. A wide variety of Audio Formats from independent streaming services are supported and played on a standard Line Level output. The online management portal allows for convenient control of the playout and supports status monitoring and firmware management for every device. Fallback Stream and local Failover Playlist are also supported in stand-alone operation. Barix Products are developed in Switzerland.
