Privacy Policy governing Barix smartphone Apps

For the proper functional operation of our apps, the app might need access to the camera or microphone of your phone. Barix asserts that the access is used solely for the purposes of the App and that none of your personal data is accessed, copied or used in any other way. No data is sent to Barix or any third party by using our Apps.

The AudioPoint App needs access to the camera to enable scanning of QR codes. The Simple Paging App uses the microphone to allow you to make a Paging Announcement to the associated PA system.

This policy, effective from 29 August 2023, may change in the future, for example to keep current with Google guidelines and recommendations. Such changes will be notified on our website www.barix.com.

Zürich, August 2023
