

PAGING / BELLS SYSTEM FOR SCHOOL

Paging System with bells and emergency tones.

Scope / Customer Requirements

The customer was looking for a solution for paging, bells and alarm tones delivering in a school, with one master station and more than 14 zones.

Barix Solution Proposal

Barix has proposed a system based on ICpaging solution with one PS Touch, integrated with AcroVista BellCommander software for bells and alarm tones (sent as priority streams).

As zone player were proposed Exstreamer M400 and IP Former TPA400.

Barix Solution Strength / Benefits

Installation on existing network infrastructure with very low bandwidth consumption.

Great flexibility and easy installation thanks to PoE support.

Friendly user interface with simple bells/tones audio files management.

HARDWARE AND SOFTWARE INVOLVED

Annunicom PS Touch
with IC Paging firmware

or

Exstreamer M400 or IP Former TPA 400
with IP Audio Client Firmware

Acrovista Bell Commander Software

SOLUTION • Paging / Bells System for School
